

heat & frost insulators

THE HEAT/FROST INSULATORS PREVENT LOSS OF MECHANICAL HEATING AND COOLING IN HVAC SYSTEMS

Overheating in mechanical spaces costs the campus in lost energy efficiency. The heat & frost insulators add recyclable insulating materials to pipes and equipment to provide energy conservation, burn protection, and reduce unnecessary wear and tear on other mechanical room equipment.

The shop also performs insulation repairs and upgrades to all mechanical heating and cooling systems to provide increased efficiency of those systems by reducing losses through unrestrained heat transfer.
