

LARGE BOX: RECHARGEABLE BATTERY AND CELL PHONE PROGRAM GUIDELINES

Follow these 6 simple steps, and you'll be on your way to responsibly recycle rechargeable batteries and cell phones.

Step 1: UNDERSTAND WHAT CAN BE ACCEPTED FOR RECYCLING

- Rechargeable batteries each weighing less than 11 lbs
 - Nickel Cadmium (Ni-Cd)
 - Nickel Metal Hydride (Ni-MH)
 - Lithium Ion (Li-Ion)
 - Nickel Zinc (Ni-Zn)
 - Small Sealed Lead Acid (SSLA/Pb)
- Cell Phones (and their batteries) - regardless of size, make, model or age.

STEP 2: BUILD THE BOX

Remove shrink wrap. Pull and lift front flap.

STEP 2: (CONT'D)

Insert header tabs into top slots and side flaps into back slots. Ensure bags are neatly positioned.

STEP 3: DISPLAY THE BOX

Display the Call2Recycle collection box in a monitored, but viewable, location.

STEP 4: BAG IT...

Insert one battery or cell phone in provided bags. For big batteries, or if no bag is available, cover terminals with tape (electrical/duct/masking).

SEAL IT...

Remove plastic strip from top of bag and seal.

DROP IT!

Deposit sealed bag into the box.

STEP 5: SECURE BOX

When the box is full (do not overfill; 50 lb limit): Release header tabs and fold over front of box. Insert flaps into front slits.

STEP 6: PREPARE SHIPMENT

Secure box by cross-taping both vertically and horizontally. Print your return address on the pre-paid, pre-addressed shipping label. Add box to daily FedEx or UPS** pick-up.

ADDITIONAL INFORMATION

**UPS may charge a fee for scheduling pick-ups, so to avoid these charges, we recommend that you hold containers until a UPS delivery is made to your location.

Recharging the planet. Recycling your batteries.™

Dear Call2Recycle Program Participant:

Welcome to Call2Recycle®, a program of the Rechargeable Battery Recycling Corporation (RBRC), promoting environmental sustainability by providing free battery and cell phone recycling in North America. Call2Recycle applauds you for taking a proactive role in the preservation of our environment. Together, we can Recharge the Planet.

The Call2Recycle program is easy to implement - just follow these simple steps:

1. **READ** the enclosed information and the safety guidelines that are printed on your collection box.
2. **TRAIN** the appropriate staff or personnel who will be interacting with the collection box or program. Be sure to emphasize the importance of the one battery (or cell phone with battery) per bag rule. If bags are unavailable, you can tape the exposed battery terminals with non-conductive electrical tape before placing them in the collection box. For additional training tools, please visit call2recycle.org.
3. **DISPLAY** the Call2Recycle collection box in a monitored, but viewable, location. Keep box in a cool and dry location.
4. **BEGIN COLLECTING** all rechargeable batteries weighing less than 11 lbs each, and cell phones (with or without their batteries), and place in the box for recycling. The Call2Recycle program **does not** accept alkaline, lithium primary, non-rechargeable or wet cell batteries.
5. **REPLACEMENT BOXES** will automatically be sent to you allowing you to save time! Once your shipment has been received at the recycling facility, Call2Recycle's automated program will determine when more boxes should be sent to your location (allow up to three weeks for your replenishment boxes to arrive). Before ordering additional boxes, please check your location for boxes that have not been shipped, are not filled or remain unused. Exhausting supplies prior to ordering more supplies helps reduce costs and maintain efficient processes.

Safety & Compliance

The Call2Recycle program operates in compliance with the U.S. Department of Transportation safety processes to ensure the safe collection, transport and recycling of batteries. Under this commitment, all participants must adhere to the ONE rechargeable battery, or ONE cell phone with battery, per bag rule. Each collection box must be packed as required by US DOT Special Permit DOT-SP 14849, and to that end has already been marked with "Used Batteries for Recycling: May Contain Lithium (ion) and Nonspillable Batteries. FOR HIGHWAY OR VESSEL TRANSPORT ONLY - FORBIDDEN FOR TRANSPORTATION BY AIRCRAFT." In case of emergency, you may call Call2Recycle's 24 hour INFOTRAC® response line at 1-800-535-5053.

Questions? If you have any program questions, please contact Call2Recycle's Customer Service Department by calling toll free 877-723-1297 or emailing customerservice@call2recycle.org.

Thank you for your support and for making a commitment to the environment.
