**MCORE Project 4 – Closure of the West Leg of Chalmers Street at Wright Street**  
*(Wright Street and Chalmers Street)*

Champaign – On Monday, August 26, 2019, the Multimodal Corridor Enhancement Project (MCORE) will close the west leg of Chalmers Street at Wright Street to reconstruct the western half of the intersection.

Northbound Wright Street traffic will need to continue north on Wright Street. Eastbound Chalmers Street traffic will not have access to Wright Street. Work is expected to continue through mid-September.

The City of Champaign appreciates the cooperation and patience of property owners, residents, and visitors of the Campustown area during this important project. Additional updates will be provided as the project progresses. For additional information, visit [www.mcoreproject.com](http://www.mcoreproject.com).
